

**YOU WROTE THE RULES.
WE UPPED THE ANTE.**

Gathering real-world insight through Customer Advocate Groups (CAGs), we found out exactly what you need to get more done in a day. So we designed the all-new L-Series Skidders and Wheeled Feller Bunchers, 800M- and 900M-Series Tracked Feller Bunchers to redefine the meanings of uptime, productivity, and low daily operating costs. And then we tested them until they exceeded your expectations.

Watch all four videos to see customer reviews, footage of the machines in action, and a complete overview of our newest game-changing forestry lineup.

**WELCOME TO THE
BIG LEAGUES.**

**CONSIDER THE
GAME OFFICIALLY
CHANGED.**

SEE FOR YOURSELF

**UNLIKE ANYTHING
YOU'VE EVER OPERATED.**

Meet the all-new John Deere L-Series Skidders and Wheeled Feller Bunchers, and 800M- and 900M-Series Tracked Feller Bunchers. Celebrating our 50th year of manufacturing skidders and built on 178 years of groundbreaking innovation, our engineers invested thousands of hours to take these machines further than ever before. Gathering input from experts like you. Testing prototypes in real-world conditions. And refining them into what you see today.

THE RESULT? Machines that make your operation more productive and profitable than ever before.

The machines just blow me away. I love the configuration of the boom, the new cab design, the undercarriage, the visibility — everything is just that much better.

Rick Cunneen
