

HARRI FRANCIS

Designer
Fabricator
Joiner

I trained and worked as a bespoke joiner, which taught me different tooling and machining methods, gaining an attention to detail that is required to create objects to a bespoke quality. Missing creative input, I enrolled at Goldsmiths UOL where I studied design, attaining a deep understanding of conceptual design. Whilst studying I working as an Art Fabricator at The White Wall Co, handling a large variety of projects for some of the biggest names in the art world. I wish to bring my experience to new areas of Design.
