

STUDY IN EUROPE

NLG LAW.GROUP

ABOUT US

NLG Company provides a reliable, fast and confidential support for you and your business in Europe and beyond.

We have been working since 2004 and have sufficient experience and skills to provide effective support to our clients in solving a wide range of tasks related to business organization and support.

Our motto is "The task is set - the task must be completed!"

Our main office is located in Riga, Republic of Latvian Republic.
We support our customers all over the EU.

INTRODUCTION

Choosing a university, department and country to study abroad is quite a challenge for students. Nowadays, in conditions of crisis and aggravation of the international situation, the cost of education and living in the chosen country and safety also becomes an important factor.

Latvia, as a member of the European Union, with a sufficient number of highly reputable universities that provide a full European degree in higher education, with its convenient location between Scandinavia and Central Europe and low cost of living compared to other EU countries is a great option for any international student.

Numerous programs of Latvian universities, adapted for English-speaking students offer excellent education in a variety of fields, ranging from the humanities and medicine to specific engineering and IT fields.

INTRODUCTION

Latvia is a European country on the shores of the beautiful Baltic Sea, located in the temperate climate zone and maintaining a good level of environment.

The people of Latvia are responsive and tolerant of foreigners.

In addition, there is already a fairly large diaspora of students from Asia in Latvia, and Asian cuisine, including Indian cuisine, is quite popular, which makes it easier to adapt to a new environment.

In turn, our company NLG is ready to help students in every way. Additionally to general consulting and assistance with admission and visa issues, we offer a comprehensive package of services to make the entire process of studying abroad seamless.

INTRODUCTION

The specialists of our company can give you, our clients, useful advice on how to speed up the process of admission and obtaining a visa for the universities we represent.

We have sufficient experience and knowledge of the criteria and formalities required by universities and embassies, and we can help you effectively solve the problems you are facing.

We will carefully evaluate the progress of potential students, their level of English, check the correctness of the filling out and execution of documents.

CONSULTING

You can contact us for advice, and we will provide you with complete information on available courses, programs and universities so that you have a sufficient choice of options. Getting higher education abroad is an important decision that the future student and his/her family should make consciously, with as much useful information as possible. Our consultants will also familiarize you with the level of potential costs of living in the country and the peculiarities of the environment.

ADMISSIONS FORMALITIES

As your career counselor, we are responsible for completing all formalities related to hiring and obtaining your visa. To simplify your study abroad experience, we have special departments that can effectively address your questions and provide comprehensive guidance on documents and other requirements. We keep our students informed about every step taken on their profile.

ASSISTANCE IN WRITING A MOTIVATIONAL LETTER

The motivation letter is one of the most important things to consider when applying for a visa.

The motivation letter is a student's business card, showing his or her interest and motivation in entering the University and indicating his or her true intention to study.

We can help you to cope with this task and your motivation letter will be complete and capacious.

VISA SERVICES

The visa processing and preparation of the package of documents for its receipt is of great importance in preparing for the admission process. We provide clients with a complete guide to obtaining a visa because we understand that students must be properly prepared.

We have specialists who have extensive experience working with embassies, know and understand their rules, which increases the chances of obtaining a visa. We specifically help our clients to prepare a package of necessary documents in the necessary order and carefully check all files in order to avoid mistakes and, accordingly, refusal to issue a visa.

VISA TEST INTERVIEW

During visa processing embassies conduct interviews to understand the intentions and honesty of students' desire to study at the chosen university. We will, if you wish, conduct several test interviews, which will make it easier for you to pass the real interview at the embassy.

MEETING AND ACCOMMODATIONS UPON ARRIVAL

Most students are completely unaware of the costs of accommodation and meals, and may encounter difficulties in accommodation and arrival. We help our clients to solve these issues, provide a meeting, transfer, select and provide comfortable accommodation at affordable prices, with all the necessary facilities. Some universities provide on-campus housing, which we can help you to book in advance.

INSURANCE

Students are required to have medical and travel insurance to apply for a visa, so we help them to arrange insurance with reputed agents. All countries have different rules and regulations regarding the insurance, as some countries may request their country's insurance, which can also be arranged by Indo-European experts.

PRE-DEPARTURE AND POST-ARRIVAL BRIEFING

We believe that students going to University in our country should understand the basic cultural traditions, peculiarities and basic laws of the country. Therefore, before traveling we conduct a briefing for our customers (provide a file with the information for review). Without this basic information, it will be quite difficult for a student to adapt to a new environment. Upon arrival, we will also verbally give the necessary useful information once again.

FORMALITIES UPON ARRIVAL

When students arrive at their destination country and university, they don't have to worry because all the formalities and paperwork are already taken care of by us. Our partner universities will help students to complete all official formalities.

POST-ARRIVAL SERVICES

We not just prepare and accompany the entire process of entering university, but also, if you wish, provide ongoing support throughout the entire period of study. If students have any problems during their studies, they can easily contact us to get the right solution. For this purpose we have a subscription package, by issuing which you can be sure that all the vital issues and problems of your child or yours will be resolved.
